

ETERNABOND Roofing Tape

For use with the [Commercial Heated Roof Mat System](#). DoubleStick tape is a self-sealing sealant tape used to create a permanent, weather proof, conformable seal between two or more surfaces. The tape is made of a high-strength, microsealant adhesive with a backing of a UV-stabilized, non-reflective, and flexible polymer. This combination provides excellent adhesion and heat resistance properties, ensuring a long-lasting, weather-resistant bond that can withstand extreme temperatures and harsh weather conditions.

- 2 Inch x 50 Foot roll (60 Mil)
- Simple and quick three-step instruction, using sticky tape with no trays or messy solvents to clean up after the project completion, and no other adhesive needed
- Tape is made with MicroSealant® Technology, a specially formulated sealant that forms a stable molecular structure that is light, heat and ozone resistant
- Tape is easy to install- simply peel off the backing and apply the tape to the roof surface, pressing down firmly to ensure a secure bond
