

Super G Floor Mat

This non-slip matting promotes safety – to maintain employee performance, decrease injury related time off, workers compensation claims, and accident related litigation. Designed for use in greasy areas just waiting for an accident to happen.

- Made with crushed garnet for secure footing in grease / oil areas
- Backing restricts creeping / Tough but lightweight
- Low profile eliminates tripping hazard and allows it to be placed in thresholds
- Resists fungal & bacterial growth

Super G slip-resistant safety mats are:

- Slip-resistant in water, grease, and oil
- Extremely tough and durable
- Flexible even in freezing temperatures
- Lightweight and thin (1/8 inch thick, a 3' x 10' is only 25 pounds)
- No installation needed
- Easy to handle, clean, and maintain
- The regular version has a tacky polyurethane backing that is especially conducive to temporary floor adhesion and slip resistance. It is meant to be removed and cleaned and moved around as necessary.

Super G slip-resistant floor mat has a

unique surface, incorporating round textured ceramic beads and crushed garnet to minimize slipping while facilitating easy cleaning. Super G safety mats are designed to be slip-resistant in wet, hazardous areas including walk-in freezers, wet and slippery ramps, and stairs indoors or outdoors.

Super G safety mat is constructed of rugged components:

- Tacky and durable polyurethane backing to prevent hydroplaning – mat stays put
- A middle layer of fiberglass that prohibits tearing and increases strength
- A durable top layer of ceramic beads and crushed garnet in a polyurethane matrix
- **Super G** has the same basic properties of [Grip Rock](#) but has a special abrasive top surface designed specifically for use in kitchen fry areas, work stations, garages and production areas in factories that are often greasy, oily and dangerous. Super safety mat is constructed of rugged components:
 - Tacky and durable polyurethane backing to prevent hydroplaning – mat stays put
 - A middle layer of fiberglass that prohibits tearing and increases strength
 - A durable top layer of crushed garnet in a polyurethane matrix
